CYMBAL designed by Helena Svensson 2012

Cymbal, designed by Helena Svensson, has taken its name from the world of music. Inspired by the instrument's simple shape, size and position Helena has created a floor light and a pendant.

"The instrument has always fascinated me emotionally as well as sculpturally. This simple shape is a striking element in design," says Helena.

By adapting the shape of the Cymbal, with its surprisingly light design reminiscent of a trophy or shield, the designer pays homage to fine craftsmanship and draws attention to the way light spreads so beautifully over the contours.
